

WHOLE LIFE INSURANCE

A traditional Whole Life Insurance policy offers the security of coverage that does not expire with the opportunity to build cash value on a tax-deferred basis.

Whole Life policies from GPM Life feature level premiums, payable to age 97, with a level lifetime death benefit. Over the life of the product, a portion of the premiums will go toward the cash value element of the policy with any interest earned added to the total cash value. The policyholder may borrow against this cash reserve via policy loans.

Cash value accruals may eventually grow to a size that allows premiums to be paid from non-guaranteed dividend credits.

The basic Whole Life policy assumes premiums are payable for the life of the policy. We also offer Life Paid Up at 65 (premiums payable to age 65 only) and Twenty Payment Life (premiums payable for 20 years only). These options require higher premiums but typically build cash value more quickly than Whole Life Payable to 97.

GPM Life Whole Life products include:

- Level premiums that will never increase
- Guaranteed death benefits, as long as premiums are paid*
- Cash values based on competitive guarantees
- Additional Term, Spouse and Child riders

** absent suicide or misrepresentation of health
Whole Life form number series – 58P LIF08*
